MK POWERED

Test All Your Batteries and Chargers With Just One Device.

The MK70 is a true discharge machine with the ability to download capacity results to your computer via a USB connection. The software is very user friendly and will give an accurate assessment of the battery capacity or charger quality. Reports can be printed and/or stored to justify battery or charger replacement.

- 12 Volt Battery Discharge Tester
- 12 Volt and 24 Volt Charger Tester
- Tests Gel and AGM Batteries
- Instructional video available on website

- Test Download and Graph Print Features
