

Home Use Devices

***How to Prepare for and Handle Power Outages
for Medical Devices that Require Electricity***

The bottom portion of the graphic shows a cityscape at night with numerous lights. Several bright lightning bolts are striking the city. The FDA logo is centered over this scene.

FDA

Home Use Devices: ***How to Prepare for and Handle Power Outages*** ***for Medical Devices that Require Electricity***

As a home medical device user, it is important that your device works during a power outage and that you have a plan in place to ensure you know what to do. This completed booklet will help you have an established plan to obtain and organize your medical device information, take necessary actions so that you can continue to use your device, have the necessary supplies for the operation of your device, and know where to go or what to do during a power outage.

If you use more than one medical device, you should complete a booklet for each device and ask your healthcare professional to help you. Remember to update this booklet as your treatment, doctors, caregivers, or personal contacts change.

Name: _____
(Last Name/Family Name) (First Name) (Middle Initial)

Date of Birth: _____ Sex: Male Female
(Month/Day/Year)

Address: _____
(Number & Street) (Apt. No)

(City) (State) (ZIP code)

Home Phone Number: _____

Doctor's Name: _____

Doctor's Phone Number: _____

My Device is: _____ **Model #** _____

Local Power Company _____ **Phone #** _____

Local Fire Department _____ **Phone #** _____

Ambulance Service _____ **Phone #** _____

Home Care Agency _____ **Phone #** _____

Health Care Provider(s) _____ **Phone #** _____
(Nurse, Therapist, Doctor)

_____ **Phone #** _____

Device Supplier _____ **Phone #** _____

My current medicines and location(s) are: _____

My personal emergency file contains:

- Instructions for using the medical device and all device manuals.
- First aid kit
 - Medical records
 - Insurance cards
 - Current home care doctor's orders
 - Plan of treatment
- What a family member, friend or hospital should do to help me in an emergency.
- My power of attorney (personal and medical) allowing someone to act on my behalf if I am not able to.
- Contact information for my health care provider(s) and pharmacy.
- Contact information for family, friends and medical transportation services.
- Where to go before, during and after an emergency.
- Where to go for medical supplies.
- My file is located here: _____

General

Yes No Can a power surge cause my device to stop working? If yes, what type of surge protector do I need?

Yes No Does my device have a back-up system? If yes, how long will it operate and where is it located?

Yes No Can my device operate on another power source? If yes, what type?

Yes No Could I be harmed if my device stops for a short period of time? If yes, what is that time period?

Yes No Will my device still work if it does not have power for an extended period of time? If yes, how long can it work without power?

SECTION 2 - Gather Information from the Device Manufacturer or Medical Provider on Power Outage Situations

Yes No What happens if I lose power in the middle of a treatment? Should I restart a treatment if it is stopped in the middle or resume where it stopped?

Yes No Do I need extra medical supplies that would last for a minimum of 3 days? If yes, where are they located?

Yes No Does my device or do my supplies have to be kept at a certain temperature? If yes, what temperature?

Yes No Do I need a portable cooler and ice packs to store refrigerated supplies and medicines? If yes, where are they located?

Yes No Do I need the proper products to clean my device? If yes, what are they and where are they located?

Yes No Is there specific information about power outages for my specific device that I should write here?

Additional Power Source-Batteries

Yes No Can my device use batteries in the event of a power outage?

Yes No Can I change the batteries in my device? If not, who should I contact?

Yes No Do I have a functioning flashlight with an extra supply of batteries? If so, where are they located?

What type of batteries does my device use?

How many batteries does it take to operate my device?

How long will the device last on battery power?

How do I switch operation of my device from battery to electric power?

Remember to:

***Keep your personal emergency contacts
up to date!***

Notify Contacts

Notify the following when power is lost and restored:

- Local power company _____ Phone # _____
- Local fire department _____ Phone # _____
- Family and friends _____ Phone # _____
- Health care provider(s) _____ Phone # _____

Check Supplies

Look for the following when checking supplies and do **NOT** use if:

- Packaging is torn or damaged.
- They are wet or dry and shouldn't be.
- They are very hot or very cold and shouldn't be.
- There are loose or missing pieces and shouldn't be.

Check Device

Look for the following when checking your device and do **NOT** use if you find:

- Signs of damage, including power cords.
- Incorrect device settings.

Remember to:

***Inform your caregiver if you have moved
your emergency file!***

Supplies

I should contact the following if I notice anything unusual about my supplies (check all that apply).

- Home care agency _____ Phone # _____
- Health care provider(s) _____ Phone # _____
- Pharmacy _____ Phone # _____

Device

I should contact the following if I notice anything unusual about my device (check all that apply).

- Home care agency _____ Phone # _____
- Health care provider(s) _____ Phone # _____
- Pharmacy _____ Phone # _____

Remember to:

***Replace your batteries according to
the manufacturer's instructions!***

When the power goes out, I should **NOT**:

- Perform an action to the device that I am not sure of
- Assume my device is working correctly
- Leave home without my device
- Forget my power outage booklet

Remember to:

***Always take this booklet when a
power outage emergency occurs.***

A large white rectangular area with a yellow border, containing ten horizontal black lines for writing.

A **medical device** is any product or equipment used to diagnose a disease or other conditions, to cure, to treat or to prevent disease. The Food and Drug Administration's Center for Devices and Radiological Health regulates medical devices to provide reasonable assurance of their safety and effectiveness.

A **home use medical device** is intended for users in any environment, apart from the professional healthcare facility or the emergency medical services, requires adequate instructions for use, and may also require training for the user by a qualified healthcare professional to assure safe and effective use.

- A user is a patient (care recipient), caregiver, or family member who directly uses the device or provides assistance to use the device.
- A qualified healthcare professional is a licensed or non-licensed healthcare professional with proficient skill and experience with the use of the device so that they can aid or train someone to use and maintain the device.

For additional FDA information, visit our Home Use Devices website at:
<http://www.fda.gov/homeusedevices>
