

Batteries for Professional Floor Cleaning Machines

**Sealed VRLA Batteries for long lasting
and reliable power when you need it**

UL Recognized Component
#11115858

BENEFITS

- Sealed VRLA Maintenance Free – minimizes or eliminates servicing and downtime of equipment
- High cycle life performance
- No gas odors to alarm customers under normal service conditions
- Lower risk of explosion from gas build-up when charging or from poor maintenance
- No corrosive acid electrolyte exposure from spillage and boil over to damage the machine or floor surfaces
- No corrosion on cable connections and other sensitive components
- Lower long-term cost because of reduced maintenance time and handling

CHARGING

REQUIRED - Charging Profile Adjustments for GEL, AGM and Flooded Batteries

All Lead Acid batteries work similarly but their differing designs affect their optimum charging requirements. If not properly adjusted, the charger may ultimately damage the batteries. A charger setting prescribed for Sealed VRLA (Valve Regulated Lead Acid) Gel or AGM batteries will chronically undercharge a flooded battery. Conversely, a charging profile set for flooded batteries will overcharge and dry out a Sealed VRLA battery and shorten its life.

Fortunately, in the Floor Cleaning Industry most machines are equipped with chargers that can be adjusted for the proper charging program. So, be certain to set your charger settings properly to ensure optimal performance.

ABOUT MK BATTERY

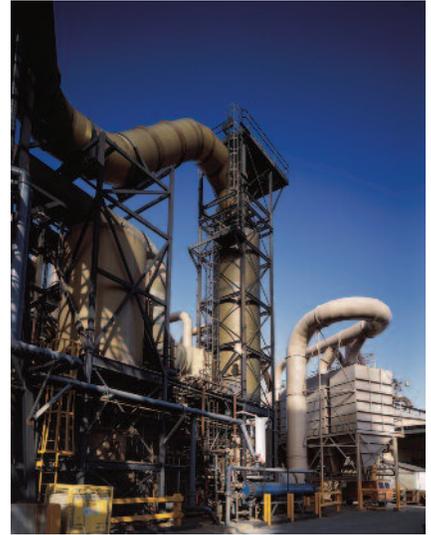

Delivering Quality, Value & Service

For over 30 years, MK Battery has stood for quality, value and service. Our global distribution network provides local delivery/regional shipping and free spent battery pickup and recycling (to customers where available), ensuring fresh local inventory delivered ontime and when you need it. Depend on MK Battery.

RECYCLING

EPA approved spent battery disposal and recycling

Battery disposal can be a costly and time consuming process. MK Battery recognizes that regulatory concerns impact the life chain of a battery and that facilities are vulnerable to some liability if batteries are not disposed of correctly and legally. All spent batteries picked up by MK trucks are delivered to E.P.A. – permitted smelters and licensed recyclers exclusively. Spent battery pickup and recycling is a FREE SERVICE to establishments located within our route delivery service areas.
